

SINCE 1848

KNAP-PACK™ STORAGE COMPARTMENTS

For Mounting Between the Body and Cab

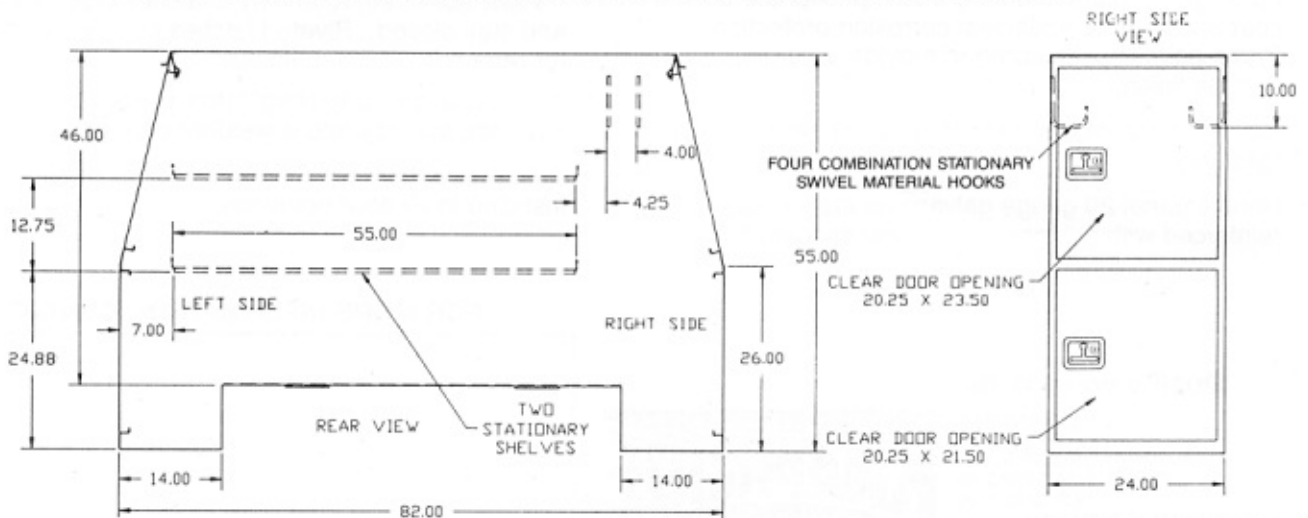

STANDARD FEATURES:

- Tapered profile to conform to cab configuration.
- 5 year limited warranty covering rust thru, hinge operation and attachment, and twist locks.
- Heavy duty 14 gauge galvaneal construction.
- Complete immersion in electrodeposition gray epoxy prime paint featuring a zinc phosphate pre-coat and seal for additional corrosion protection. Prime paint is oven cured to provide a hard durable finish.
- Mar resistant, glossy interior finish, painted light gray.
- Double panel 20 gauge galvaneal steel doors reinforced with full-length steel "hat sections."
- Exclusive stainless steel continuous door hinge is pry-proof, features a built-in weather shield and provides full length door support.
- Double-spring-over-center door retainers.
- Tight sealing T-handle single point twist locks constructed of corrosion resistant materials. Locks are riveted to the door for easy repair or replacement.
- Automotive "bulb type" neoprene door seals installed in all door openings.
- Four combination stationary/swivel material hooks.
- Two stationary shelves.

(Model KP-82C-L shown with 14.25" x 24.12" under body toolbox mounted on each side)
